SUMMARY

Software Development student at SAIT (graduating August 2026, GPA 3.63/4.0) with hands-on experience building full-stack web applications end-to-end, from database design and backend logic to responsive, polished front-ends. Comfortable across the stack with React, TypeScript, JavaScript, Java, Python, C#, and SQL, with solid foundations in object-oriented programming, RESTful APIs, and relational databases. Shipped real projects independently, including an AI-integrated SaaS platform and a live personal portfolio, and uses AI-assisted development tools as part of a normal workflow. A self-directed, fast learner with strong communication skills and a genuine drive to keep building and improving his craft.

EDUCATION

Diploma, Software Development

01/2025 – 08/2026

Southern Alberta Institute of Technology (SAIT) · Calgary, AB · GPA: 3.63 / 4.0

EXPERIENCE

Omni Customer Fulfillment Associate

11/2025 – Present

Walmart · Calgary, AB

- Pick, pack, and fulfill 150+ online customer orders daily with high accuracy under tight deadlines in a high-volume omnichannel environment

Sales Associate

02/2025 – 12/2025

7-Eleven · Calgary, AB

- Handled customer transactions and store operations reliably in a fast-paced retail setting

PROJECTS

CourseSync, Instructor-Course Assignment System

05/2026 – Present

React 18, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Zod, Claude API

- Built a full-stack web application end-to-end, working across a React and TypeScript front-end, backend logic, and RESTful APIs
- Designed a relational PostgreSQL database schema (13+ tables) with triggers and constraints, and built an automated data-import pipeline with validation
- Built a weighted scoring engine that processes structured data across multiple constraints to generate reliable, data-driven recommendations
- Integrated the Anthropic Claude API to add an AI-powered feature, and shipped through a CI/CD pipeline with automatic deployment on every push

Personal Portfolio Website

09/2025 – Present

React.js, JavaScript, CSS3, Framer Motion, Git, Vercel

- Designed and built a fast, visually polished public website end-to-end using React and JavaScript, with painstaking attention to detail
- Styled a component-based interface with custom CSS (variables, Flexbox, Grid) and Framer Motion animations, tuned for cross-device responsiveness
- Set up a CI/CD pipeline connected to Git and GitHub for automatic redeployment on every push, keeping the live site always up to date

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C#, SQL (PostgreSQL, Oracle), C++, C, HTML, CSS

Frameworks & Libraries: React 18, Next.js, Node.js, Vite, Tailwind CSS, Framer Motion, React Native, .NET, Zustand, React Router

Databases: PostgreSQL, Oracle SQL / APEX, Supabase (Auth, Triggers, Schema Design), SQL Query Optimization

Cloud & DevOps: Git, GitHub, GitHub Actions (CI/CD), Docker, Azure, Vercel, PowerShell

APIs & AI: RESTful APIs, API Design, Anthropic Claude API, Claude Code, GitHub Copilot, JSON, HTTP

Tools: VS Code, Eclipse, Figma, Jira, Power BI, Microsoft 365, Microsoft Excel

Methodology: Agile/Scrum, SDLC, OOP, Data Structures & Algorithms, Unit Testing (JUnit), Code Review, Continuous Deployment
